Uroš Milutinović

AI Engineer & Software Developer

umilutinovic25@gmail.com | +381 64 991 0200 | Belgrade, Serbia
github.com/umilutinovic25-hash | linkedin.com/in/urosmilutinovic | umilutinovic25-hash.github.io/portfolio

PROFESSIONAL SUMMARY

AI and software engineer who ships production systems, not just prototypes. Built a RAG pipeline (LangChain, GPT-4, Pinecone) with a FastAPI + React.js service layer handling 500+ queries/day in production; fine-tuned open-source LLMs (Mistral 7B, Llama 3) with LoRA, evaluated through RAGAS and BERTScore pipelines; designed multi-agent and Claude-powered agentic systems, from a voice-controlled Revit BIM plugin to an autonomous job-application agent. B.Sc. in New Computer Technologies (Feb 2026), AWS Machine Learning Specialty certified.

KEY SKILLS

- **AI / ML:** Python, PyTorch, LangChain, RAG, LLM fine-tuning (LoRA), Hugging Face, OpenAI API, Anthropic Claude API, Pinecone, multi-agent orchestration, evaluation (RAGAS, BERTScore)
- **Full-Stack:** FastAPI, React.js, Java, Spring Boot, PHP, MySQL, PostgreSQL, REST APIs
- **DevOps / Cloud:** Docker, Git, Linux, AWS (ML Specialty certified), Agile / Scrum
- **Digital & Content:** Meta Ads (Facebook & Instagram), campaign optimization, video editing & publishing, Canva

WORK EXPERIENCE

Freelance AI & Full-Stack Developer — 2025 – Present

Self-employed · Remote (international clients)

- Design and deliver AI and full-stack products end-to-end — most recently a Claude-powered job-analysis agent and an LLM evaluation framework (see Featured Projects).
- Delivered live client websites, including N Detailing Studio and FitPro Agency — a lead-generation SPA with EmailJS, Google Sheets CRM, Meta Pixel tracking, and an admin panel.
- Run Meta Ads campaigns and produce short-form video content for client marketing funnels.

AI Engineer — Dec 2024 – Apr 2025

NovaMind AI Solutions · Belgrade (Remote) · alongside B.Sc. studies

- Designed and shipped a RAG system for document Q&A using LangChain, GPT-4, and Pinecone — serving 500+ queries per day in production.
- Fine-tuned open-source LLMs (Mistral 7B, Llama 3) on domain-specific data using Hugging Face Transformers and LoRA adapters.
- Built a FastAPI backend for asynchronous model inference with a React.js frontend and real-time streaming; achieved sub-2-second response times and 90%+ accuracy on internal benchmarks.
- Implemented RAGAS / BERTScore evaluation pipelines; containerized and deployed models via Docker with structured logging.

IT Support Engineer — Jun 2024 – Dec 2024

Microsec d.o.o. · Belgrade

- Resolved 20+ tickets per week and wrote internal runbooks that cut repeat incidents by 30%.
- Administered MySQL databases with zero data loss; configured developer workstations and supported deployment pipelines and Postman API testing.

ADDITIONAL EXPERIENCE

Truck Dispatcher & Track-and-Trace Specialist — Sky Freight Dispatch (U.S. market), Oct 2025 – May 2026 (part-time). Coordinated U.S. freight transport and GPS tracking; managed all client and driver communication in English.

Guest Services & Operations — Work and Travel USA Program, United States, Summer 2025. Full-time guest-facing role in English; resolved a high volume of guest requests in a fast-paced international team.

FEATURED PROJECTS

Revit AI Assistant — Voice-Controlled Multi-Agent BIM Automation Plugin

AI plugin for Autodesk Revit that automates engineers' workflows directly from the 3D building model via natural-language voice commands. Multi-agent architecture: an orchestrator agent interprets intent and delegates to specialized sub-agents for quantity takeoffs, material estimation, and model manipulation.

Stack: C# / .NET, Revit API, multi-agent LLM orchestration, Speech-to-Text

JobScout — AI Job-Application Agent (Claude API) · github.com/umilutinovic25-hash/jobscout

Autonomous agent that analyzes job postings against a CV: scrapes the posting, extracts structured requirements with Claude, scores the match on a calibrated 0–100 rubric with gap analysis, drafts a tailored cover letter, and tracks every application — including per-application API cost — in SQLite.

Stack: Python, Anthropic Claude API, structured outputs, httpx + BeautifulSoup, SQLite, pytest

dine-agent — AI Phone Host for Restaurant Reservations · github.com/umilutinovic25-hash/dine-agent
Claude-powered voice agent that answers calls and manages the booking book. Every write goes through a policy-owning engine — service windows, table capacities, dining durations, conflict detection — so the model proposes but can never invent a table.
Stack: Python, Anthropic Claude API (tool use), FastAPI, Web Speech API, pytest

poslovi-mcp — Model Context Protocol Server · github.com/umilutinovic25-hash/poslovi-mcp
MCP server and CLI that lets any AI assistant search Serbian job boards (Infostud, HelloWorld.rs) through structured tools — HTML parsed into typed results, no API keys required.
Stack: Python, Model Context Protocol (MCP), httpx, BeautifulSoup, CLI

llm-eval — LLM Evaluation Framework · github.com/umilutinovic25-hash/llm-eval
Framework for comparing LLMs (Claude, local models via Ollama) on the same task suite — accuracy, cost, and latency side by side. YAML-defined evals, async runner with per-request token and cost tracking, JSON snapshots for regression detection, non-zero exit codes for CI gating, and a self-contained HTML report dashboard.
Stack: Python, asyncio, Anthropic API, Ollama, YAML, pytest

Razumem Nalaz — Lab-Report Explainer PWA · umilutinovic25-hash.github.io/razumem-nalaz
Progressive web app: photograph a medical lab report and get a plain-language explanation of each value. OCR and interpretation run fully on-device — no data ever leaves the phone.
Stack: JavaScript, PWA, on-device OCR, GitHub Pages

SafeCircle — Personal Safety App for Online Dating · github.com/umilutinovic25-hash/safecircle
Privacy-first safety app (MVP backend) for meeting people online: pre-date sessions share live location with a trusted contact via SMS link, plus one-tap SOS alerts, check-in prompts, and reverse-image-search photo verification. Location trail is deleted when a session ends — privacy by design.
Stack: Python, FastAPI, Twilio SMS, REST API, geolocation

N Detailing Studio — Client Business Website · umilutinovic25-hash.github.io/ndetailing-studio
Sole designer and developer of a car-detailing business's website — responsive layout, service catalog, gallery, and booking flow — live on GitHub Pages.
Stack: HTML5, CSS3, JavaScript, responsive design, GitHub Pages

Car Service Platform · github.com/umilutinovic25-hash/car-service-management-system
Bachelor's thesis: appointment scheduling, service history, and an admin dashboard — built solo, from 3NF database design to working application.
Stack: PHP, MySQL, JavaScript, HTML5, CSS3

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty — AWS, 2026
- Claude Code (101 & In Action) & AI Fluency — Anthropic Academy, 2026
- LLMOps & Fine-tuning — Hugging Face, 2026
- GitHub Foundations — GitHub, 2026
- Machine Learning & Deep Learning Specializations — DeepLearning.AI, 2025

LANGUAGES

- English — C1 (fluent business English)
- Serbian — native
- German — A2

EDUCATION

B.Sc., New Computer Technologies **Graduated Feb 2026**
VIŠER — College of Electrical Engineering and Computer Science, Belgrade (2022 – 2026)

Mechatronics Technician **2018 – 2022**
Technical School "17. Septembar", Lajkovac
