Uroš Milutinović

AI Engineer & Software Developer

umilutinovic25@gmail.com | +381 64 991 0200 | Belgrade, Serbia | GitHub | LinkedIn

PROFESSIONAL SUMMARY

AI and software engineer who ships production systems, not just prototypes. Built a RAG pipeline (LangChain, GPT-4, Pinecone) and a FastAPI + React.js service layer handling 500+ queries/day; fine-tuned open-source LLMs (Mistral 7B, Llama 3) end-to-end against measurable evaluation benchmarks. Comfortable owning a product from database schema to containerized cloud deployment, backed by international work experience and fluent business English (C1). Equally effective on the content side — producing, editing, and publishing video, and running Meta Ads campaigns end-to-end.

KEY SKILLS

AI / ML: Python, PyTorch, LangChain, RAG, LLM fine-tuning, Hugging Face, OpenAI API, Pinecone

Full-Stack: FastAPI, React.js, Java, Spring Boot, PHP, MySQL, PostgreSQL

DevOps / Tools: Docker, Git, Linux, Postman, Agile / Scrum

Digital Marketing & Content: Meta Ads (Facebook & Instagram), campaign optimization, Canva, video editing & publishing, social media content creation

WORK EXPERIENCE

AI Engineer

Dec 2024 – Apr 2025

NovaMind AI Solutions · Belgrade (Remote)

- Designed and shipped a RAG system for document Q&A using LangChain, GPT-4, and Pinecone — serving 500+ queries per day in production.
- Fine-tuned open-source LLMs (Mistral 7B, Llama 3) on domain-specific data using Hugging Face Transformers and LoRA adapters.
- Built a FastAPI backend for asynchronous model inference with a React.js frontend and real-time streaming; achieved sub-2-second response times and 90%+ accuracy on internal benchmarks.
- Implemented RAGAS / BERTScore evaluation pipelines; containerized and deployed models via Docker with structured logging.

Freelance Developer — Independent Projects

2025 – Present

Self-employed · Remote

- Design, build, and ship AI and full-stack web products end-to-end for clients and personal projects (see Projects).
- Delivered FitPro Agency, a lead-generation SPA with EmailJS, Google Sheets CRM, Meta Pixel event tracking, WhatsApp CTA, and an admin panel.
- Plan, edit, and publish short-form video content across social platforms; run and optimize Meta Ads (Facebook & Instagram) campaigns, using Canva for creative production.
- Maintain an active GitHub portfolio while continuously upskilling in AI / LLM engineering (AWS ML, LLMOps).

IT Support Engineer

Jun 2024 – Dec 2024

Microsec d.o.o. · Belgrade

- Resolved 20+ tickets per week and authored internal documentation that cut repeat incidents by 30%, with zero data loss administering MySQL databases.
- Configured developer workstations, managed user accounts, and supported deployment pipelines and Postman API testing.

Guest Services & Operations *Summer 2025*
Work and Travel USA Program · United States

- Worked full-time in English within a diverse international team in a professional U.S. work environment, resolving a high volume of guest requests under pressure.

ADDITIONAL EXPERIENCE

Truck Dispatcher & Track-and-Trace Specialist — Sky Freight Dispatch (U.S. market), Oct 2025 – Present. Coordinated U.S. freight transport and GPS tracking, and managed full client/driver communication in English.

FEATURED PROJECTS

Revit AI Assistant — Voice-Controlled Multi-Agent BIM Automation Plugin

An AI plugin for Autodesk Revit that automates engineers' workflows directly from the 3D building model, driven by natural-language voice commands. Built on a multi-agent architecture: a main orchestrator agent interprets user intent and delegates to specialized sub-agents — one handles measurements and quantity takeoffs, one estimates required materials, one manipulates model elements — each owning its part of the process while the orchestrator coordinates their outputs. The user loads a 3D project; the system handles the rest.

Stack: *C# / .NET, Revit API, multi-agent LLM orchestration, Speech-to-Text*

AI Customer Support Agent

Production-grade RAG chatbot with PDF / DOCX / web-content ingestion, a Pinecone vector store, GPT-4 streaming, and conversation memory. Handles 500+ queries/day with sub-2-second response times and 90%+ accuracy.

Stack: *LangChain, GPT-4, Pinecone, FastAPI, React.js, Docker*

FitPro Agency — Marketing SPA

Lead-generation single-page application for fitness trainers, covering the full funnel: EmailJS, Google Sheets CRM, Meta Pixel event tracking, WhatsApp CTA, and an admin panel.

Stack: *HTML5, CSS3, JavaScript, EmailJS, Meta Pixel, Google Sheets API*

Car Service Platform

Full-stack business application covering the complete SDLC: appointment scheduling, service history, and an admin dashboard. Bachelor's thesis project, built independently on a 3NF database schema.

Stack: *PHP, MySQL, JavaScript, HTML5, CSS3*

Product Management App

React SPA with full CRUD functionality, category filtering, pagination, and real-time search. Modular component architecture with clean state management via hooks.

Stack: *React.js, Vite, JavaScript ES6+, Tailwind CSS, REST API*

CERTIFICATIONS

- AWS Certified Machine Learning – Specialty — Amazon Web Services, 2026
- LLMOps & Fine-tuning — Hugging Face, 2026
- Machine Learning Specialization — DeepLearning.AI (Coursera), 2025
- Deep Learning Specialization — DeepLearning.AI (Coursera), 2025

EDUCATION

Associate Degree, New Computer Technologies *2022 – 2026*
VIŠER — College of Electrical Engineering and Computer Science, Belgrade

Mechatronics Technician *2018 – 2022*
Technical School “17. Septembar”, Lajkovac

LANGUAGES

English (C1) · Serbian (Native) · German (A2)
